

KC Engineering

Extracts engineering knowledge from unstructured engineering documents simply and precisely for industries; e.g.,

Oil and Gas
Energy
Aerospace
Automotive
Construction
Semiconductor

How KC Search Works

Type or copy any of the following in plain English into the search request box:

- Words
- Phrases
- Sentences
- Paragraphs
- Entire Documents (e.g., lab test reports, patient history records, surgery records, and RSS articles)

Then, click search to obtain the most relevant and precise results.

It's that simple!

Key Benefits of KC Engineering

- Reduces search time significantly by delivering precise and relevant documents per search specifications written in plain English
- Highlights relevant sections and paragraphs within a document
- Delivers precise search results via KC Natural Language Processing and Knowledge Modeling technologies
- Searches unstructured electronic contents with powerful context- and knowledge-aware precision search capability

Extract knowledge from engineering documents

- Request for Proposal
- Project Proposals
- Memorandum of Understanding
- Contracts
- Statement of Work
- Specification Documents
- Analysis Documents
- Engineering Diagrams
- Design Documents

Describe what you are searching for in conventional English, as if you are speaking to a person. Not only does KC Engineering identify the most relevant documents, KC Engineering also highlights the most relevant sentences and paragraphs within a selected document, thus saving your search cycle time and increasing your productivity.
