

New Product Release: KC Hire Family

Searches unstructured job and resume documents, and delivers precise search results that best match your search specifications in natural English. Jobs and resumes may be in DOC, DOCX, RTF, PDF, HTML, HTM, MHT, PPT, XLS, HLP, TXT, and more.

KC Hire incorporates enhanced user interface, new office-friendly applications, new job and resume knowledge rules, improved BSL and IKL Compilers, and improved Knowledge Sequence and Extraction Engines.

How KC Search Works

Type or copy any of the following in conversational English into the search request box:

- Words
- Phrases
- Sentences
- Paragraphs
- Entire Documents (e.g., jobs and resumes)

Then, click search to obtain the most relevant and precise results.

It's that simple!

Key Benefits of KC Hire

- Delivers precise search results per search specifications written in conversational and natural English
- Delivers sustainable competitive advantage
- Maximizes productivity leading to higher revenue gains
- Conducts knowledge-based precision search via advanced proprietary Natural Language Processing (NLP) and Knowledge Modeling (KM) technologies
- Many more improved features

What Makes Us Exceptional

Conventional search products rely on keywords yielding large volumes of indiscriminate results. This creates a multitude of unfiltered search results generating hours of unnecessary payroll.

Our knowledge- and linguistics-based KC Search renders typical search products obsolete. Using proprietary Natural Language Processing and Knowledge Modeling technologies, KC Search selects your most relevant documents according to your specifications. KC Search classifies these documents based on knowledge- and context-based relevance, highlighting pertinent information within each document.

With KC Search, you can easily search your electronic documents—such as job descriptions, resumes, finance documents, medical records, and legal documents—with efficiency and precision.
