

New Product Release: KC Medical Enterprise

Searches unstructured electronic medical records and delivers precise search results that best match your search specifications in conversational English. Medical records may be in DOC, DOCX, RTF, PDF, HTML, HTM, MHT, PPT, XLS, HLP, TXT, and more.

How KC Search Works

Type or copy any of the following in conversational English into the search request box:

- Words
- Phrases
- Sentences
- Paragraphs
- Entire Documents (e.g., lab test reports, patient history records, and surgery records)

Then, click search to obtain the most relevant and precise results.

It's that simple!

Key Benefits of KC Medical

- Delivers powerful context- and knowledge-aware medical record search capability
- Reduces search time significantly by delivering precise and relevant documents per search specifications written in natural English
- Highlights relevant sections and paragraphs within a medical record
- Delivers precise search results per search specifications written in conversational and natural English via advanced proprietary KC Natural Language Processing and Knowledge Modeling technologies
- Searches unstructured electronic medical records with powerful context- and knowledge-aware precision search capability
- Highly adaptable to existing infrastructure

What Makes Us Exceptional

Conventional search products rely on keywords yielding large volumes of indiscriminate results. This creates a multitude of unfiltered search results generating hours of unnecessary payroll.

Our knowledge- and linguistics-based KC Search renders typical search products obsolete. Using proprietary Natural Language Processing and Knowledge Modeling technologies, KC Search selects your most relevant documents according to your specifications. KC Search classifies these documents based on knowledge- and context-based relevance, highlighting pertinent information within each document.

With KC Search, you can easily search electronic documents—such as Patient Health History and Lab Reports—with efficiency and precision.
