

iCommNet® Precision Search™ Engine Kernel

KC Search Developer™ OEM Edition

Offers simple APIs and DLLs that can be integrated or adapted to in-house software products; e.g., Web applications, search engines, stand-alone products, or new products.

Searchable documents may be in DOC, DOCX, RTF, PDF, HTML, HTM, MHT, PPT, XLS, HLP, TXT, and more.

Applicable industries are:

- Health Care
- Legal
- Employment
- Defense
- eCommerce
- eDiscovery
- Media
- Publishing
- DM
- Customer Service
- ECM
- and many more

How KC Search Works

Type or copy any of the following in plain English into the search request box:

- Words
- Phrases
- Sentences
- Paragraphs
- Entire Documents (e.g., Resumes, Job Descriptions, Legal, Medical Documents, and RSS articles)

Then, click search to obtain the most relevant and precise results.

It's that simple!

Key Benefits of KC Search Developer OEM Edition

- Reduction of engineering costs and payroll while offering intelligent search and match capabilities immediately
- Delivery of customer-specific solutions by delivering precise and relevant solutions per search specifications written in natural English in real time
- High adaptation to existing infrastructure
- Simple APIs targeted for a wide range of programming language
- Use of descriptions in plain English for precision search

What Makes Us Exceptional

Conventional search products rely on keywords yielding large volumes of indiscriminate results. This creates a multitude of unfiltered search results generating hours of unnecessary payroll.

Our knowledge- and linguistics-based KC Search renders typical search products obsolete. Using proprietary Natural Language Processor technology, KC Search selects most relevant documents according to your specifications. KC Search classifies these documents based on knowledge-and context-based relevance, highlighting pertinent information within each document.

With KC Search, your host applications can easily search electronic documents—such as job descriptions, resumes, legal documents, medical documents, and RSS articles—with efficiency and precision.
