

Too many in-house, unstructured documents to search precisely?

KC Search Office delivers precise search results using proprietary Natural Language Processing technology.

How KC Search Works

Type or copy any of the following in conversational English into the search request box:

- Words
- Phrases
- Sentences
- Paragraphs
- Entire Documents (e.g., Resumes, Job Descriptions, Legal, and Medical Documents)

Then, click search to obtain the most relevant and precise results.

It's that simple!

Key Benefits of KC Search Office Edition

- Reduces search time significantly by delivering precise and relevant documents per search specifications written in natural English
- Maximizes productivity leading to higher revenue gains
- Highly adaptable to existing infrastructure
- Highlights relevant passages within a document

What Makes Us Exceptional

Conventional search products rely on keywords yielding large volumes of indiscriminate results. This creates a multitude of unfiltered search results generating hours of unnecessary payroll.

iCommNet's knowledge- and linguistics-based KC Search Office renders typical search products obsolete. Using proprietary Natural Language Processing technology, KC Search Office selects most relevant documents according to your specifications. KC Search Office classifies these documents based on relevance, highlighting pertinent information within each document.

With KC Search Office, you can easily search office documents—such as job descriptions, resumes, legal documents, finance documents, and medical records—with efficiency and precision.
