

iCommNet® KC Search™ Office Edition

Point, Extract, and Search

KC Search Office delivers precision search results using proprietary Natural Language Processing and Knowledge Modeling technologies. Your new custom search engine will be up and running instantly serving your customers.

How KC Search Works

Type or copy any of the following in plain English into the search request box:

- Words
- Phrases
- Sentences
- Paragraphs
- Entire Documents (e.g., Resumes, Job Descriptions, Legal, Medical Documents, and RSS articles)

Then, click search to obtain the most relevant and precise results.

It's that simple!

Key Benefits of KC Search Office Edition

- Reduces search time significantly by delivering precise and relevant documents per search specifications written in plain English
- Maximizes productivity leading to higher revenue gains
- Highly adaptable to existing infrastructure
- Highlights relevant passages within a document
- Protects intellectual property with role-based authentication and security

What Makes Us Exceptional

Conventional search products rely on keywords yielding large volumes of indiscriminate results. This creates a multitude of unfiltered search results generating hours of unnecessary payroll.

Our knowledge- and linguistics-based KC Search Office renders typical search products obsolete. Using proprietary Natural Language Processing and Knowledge Modeling technologies, KC Search Office selects most relevant documents according to your specifications. KC Search Office classifies these documents based on relevance, highlighting pertinent information within each document.

With KC Search Office, you can easily search office documents—such as job descriptions, resumes, legal documents, finance documents, medical records, and RSS articles—with efficiency and precision.
